

Does the Health Care Sector have similar Revenue Levels than the IT sector in year 3?

Histogram of Total revenue for Health Care Sector in year 3

These are the histograms for the annual Revenue for Healthcare and IT sector companies reported for all companies in Year 3.

Both distributions are right-skewed. Analysis shows the mean of each is higher than the median.

The mean total revenue for companies categorized under Health Sector (\$24,918,770,489) was higher compared to mean total revenue for all IT companies (\$16,763,203,719). Which indicates that companies in the Health Sector have a higher total revenue on average than all industries categorized under the IT sector.

Likewise, the median for Healthcare is almost double (\$9.9 billion) the median for IT companies (\$5.2 billion).

The standard deviation for IT is also slightly less (\$35,399,950,074.68) than that of Healthcare companies (\$40,645,108,250.77). This means, the variability in Total revenue for Healthcare companies is higher, with more companies making above \$9 billion in total revenue, and more than 50% of the Healthcare companies realised more than \$24 billion in total revenue in Year 3.

The range shows that the Health Sector has a lesser spread of revenue earnings (\$178,464,585,000) than the IT sector which has a higher spread of revenue earnings (\$232,704,883,000). This shows that the spread in revenue earnings for Health sector companies is more consistent compared to that of the IT sector.
